ACTIVITIES

crop yield conference

workshop on python

PROJECTS

underwater management system

The project, Hotel Management System is a web-based application that allows the underwater hotel manager to handle all hotel activities online. Interactive GUI and the ability to manage various hotel bookings and rooms make this system very flexible and convenient. Customers can view and book room online.

Geotagging of all educational institution integrated with virtual tour on KCET map

Every year there are lakhs of students who seek admission into our colleges around the country. Often students and their parents have to travel to colleges physically to view the entire infrastructure and gather information about various courses and facilities provided by our college. . Hence with the modern technology rapidly growing, sitting at home we can take a virtual tour of some department in our college and we too applied a admission through online. This will save the time and with the current COVID crisis, this solution will be a boon for many students as risk of getting affected while travelling will be cut short completely."

ACHIEVEMENTS & AWARDS

completed c programming at skillrack
